## Biblical Age of the Earth

---

The age-of-the-earth conflict casts doubt and unbelief in the minds of the lost and unbelievers. Evolutionists claim that the earth is billions of years old. According to chronological dates and information found within the Bible, the earth is about 6,000 years old. Young earth or old earth? If the Book of Genesis cannot be trusted, how can unbelievers trust other sections of God's Word?

Not only does the Bible indicate a young earth, the limiting factors within nature itself proclaim a young earth. These natural phenomenon date back fairly recently, indicating that the earth's age cannot be much older than 6,000 years. Otherwise, these phenomena would be much older, too. Other indicators, such as current population sizes, clearly confirm a young earth.

After reading the article, *Real Days or Thousands of Years?* (<http://www.creationtoday.org/real-days-or-thousands-of-years>), answer the following questions:

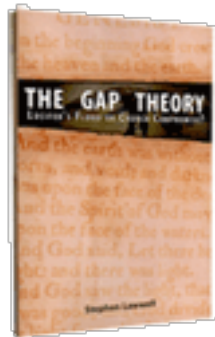

1. Based upon a synthesis of Scripture passages, the earth is approximately \_\_\_\_\_ years old.
